

Save up to 70% on energy costs by SWITCHING to LED Lighting

WHY UPGRADE to LED lighting?

LED lighting technology is highly advanced and outperforms older lighting systems in every way. These are just some of the benefits of LED lighting:

- Up to 10 times **LONGER** lamp life
- **ACCURATE** color representation
- Up to **70% REDUCTION** in energy usage
- **FAST RETURN** on investment
- **FREE OF TOXIC CHEMICALS** and UV emissions
- **GREEN** and 100% recyclable

How does a lighting upgrade work?

- STEP 1** GEI performs a free site audit and creates an energy-saving proposal
- STEP 2** GEI submits Payment History Screening (PHS) documents to PG&E
- STEP 3** PG&E conducts a Pre-Install Review & produces OBF loan documents
- STEP 4** GEI's professional team of technicians creates an energy-saving proposal
- STEP 5** PG&E conducts a Post-Install Review & customer pays loan off through savings

WHAT PROGRAMS are currently available in PG&E's territory?

PG&E is offering an Energy Efficiency Retrofit Loan Program, also known as **Energy Efficiency Financing (EEF)**. Under the EEF program, PG&E offers two products: **On-Bill Financing(OBF)** and **On-Bill financing with incentive (OBF with incentive)**.

Utility programs run for a limited time only, so call GEI today to set up your complimentary site audit!

To learn more about EEF Program, visit pge.com/eef

	OBF	OBF with incentive*
Project Cost	\$10,000	\$10,000
Energy Efficiency incentives	\$0	(\$2,500)
Loan Amount	\$10,000	\$7,500
Estimated energy savings from retrofit	\$300	\$300
Monthly loan installment billed on PG&E utility bill	\$300	\$300
Loan Term (simple payback period)	33 months	25 months

*PG&E offers Energy Efficiency Financing to eligible customers alongside calculated incentives. Projects that include measures where deemed incentives or product rebates will be obtained by the customer are not eligible.
