To Whom It May Concern

I would like to thank the Green Energy Innovations team for providing and installing the new LED lighting at all of our site in Sonoma Valley Unified School District.

The team made the entire process run smoothly by taking care of all the scheduling. Everyone took the time to explain the procedure and answered all my questions. Amanda Homa, the Assistant Project Manager, assisted with all the paperwork and made sure to I had everything I needed. Mac Lee, GEI Consultant, made sure to provide us with an installation schedule, which was also extremely helpful. I appreciated that Mac and his team updated us every step of the way. His team worked directly with our Manager of Maintenance and Operations.

The installation crew also did a wonderful job. Given that our project started during the COVID pandemic, the crew were able to start installations on time. The installation team were on track and stayed true to the projected schedule. The installation team were mindful of SVUSD employees and respected every room they were in making sure to clean and sanitize when they were finished.

I would be more than happy to recommend the company to others who might be interested.

Sincerely,
Bruce Abbott
