To Whom it May Concern

I would like to thank the Green Energy Innovations team for providing and installing the new LED lighting for our Oroville City Elementary Schools. The LED lighting really enhances the lighting levels creating a better learning environment inside and better security outside.

The team made the entire process hassle free by taking care of all the paperwork and scheduling. Everyone took the time to explain the procedure and answered all my questions. The field supervisor, Raul, made sure to provide me with installation plans daily, which was also extremely helpful. I appreciated that I was updated every step of the way.

The installation crew also did a stellar job. Even in these interesting times, they were able to start installations at the beginning of June and finish installing at all schools within the month. They were swift and mindful of the room they were in, making sure everything was clean and organized when they were finished.

I would be more than happy to recommend the company to others who might be interested.

Sincerely,

Jim Galloway
Director of Maintenance and Operations/Facilities
Oroville City Elementary School District
