Re: Letter of Recommendation

Dear Ms. Park:

I want to thank all of the staff at Green Energy Innovations for a job well done. We were skeptical that the lighting retrofit project at our school could be pulled off without a hitch, but it was!

When changing over 400 light ballasts and nearly 1,000 bulbs in an active school of 600 students and staff we expected broken light bulbs, disruption and chaos. We also expected that there would be some hidden costs that we would absorb due to the retrofit project. But, apart from recycling the old bulbs, there were no hidden costs. And, your staff finished everything in one day, with no disruption, no broken bulbs and no chaos.

Again, thanks to your staff, and should you need use me as a reference I would be happy to provide a glowing reference for your firm.

Sincerely,

St Mel Elementary School

Mary Beth Lutz
Principal
