

JAMAICA HOSPITAL MEDICAL CENTER

8900 Van Wyck Expressway, Jamaica, NY 11418 ♦ 718-206-6000

Con Edison,

Green Energy Innovations enrolled 3 buildings belonging to Jamaica Hospital in Con Edison's Commercial and Industrial Energy Efficiency Program late last year. We were so impressed with the PIR occupancy sensors installed by the GEI team that we decided to enroll 3 more hospital buildings in the program through GEI.

GEI provided a comprehensive service for the hospital, processing all applications and documents and installing each sensor, making it easy for the hospital to take part in the great energy program.

We would highly recommend going through Green Energy Innovations to participate in programs like the C&I energy program to conserve energy and cut down your company or organization's utility bills.

Thank you,

John Mezzacappa

Assistant Director of Engineering
